DID YOU KNOW that the Crystal Coast of North Carolina is one of the few places where you can photography sunrise and sunset on the ocean? Winter here can have you bundled up or walking the beach in flip flops. Join **Jamie Konarski Davidson** and **Nicole Deen** on an exploration that has unique subjects tucked in cool places.

Not only will you "catch the waves" on the Atlantic, but you'll also explore historic seaports and pristine nature at a time of year that is cooler and quieter. We'll visit coastal harbors, seaside towns and wander through maritime forest trails home to some uniquely designed trees. We're likely to run into migratory birds in our travels as well as year-round residents in the critter category.

This workshop includes in-the-field instruction, classroom sessions, image sharing and critiques so you can bring home a photo bucket filled with treasures from the land and sea.

North Carolina's Crystal Coast awaits
with ocean waves, sunrise, sunset, maritime forests,
historic seaports and places to plunder . . .

This workshop provides plenty of time for one-on-one attention to help you make your gear work for you, refine techniques and expand your "seeing" skills. Locations are rich with possibility for landscape, abstract and macro, and for learning and practicing long exposures. Experience this slice of North Carolina's coast with instructors who know where to go and openly share.

Pack an open
mind,
and get ready
for a weekend
of visual wonders!

During this workshop you'll experience the slower pace of beach life, ocean breezes, small towns and build your landscape and scenic photography skills on the shore and inland. Learn how to change the look and feel of your images while playing with shutter speeds, including long exposures. Strengthen your seeing skills for capturing the smaller moments and create a sense of place. Learn how to capture your subjects creatively and effectively through lens choice, controlling the light and composing for impact. Landscapes, scenics, intimate vignettes and macro opportunities abound.

We'll visit locations in Swansboro, home to a local icon, *Clyde Phillips*, Cedar Point Tideland Trail and other cool places that blend history, culture and natural beauty. Classroom sessions help you move post-processing to a new level and provide opportunity for image sharing and critiques.

General Schedule: Workshop begins on Thursday evening and ends at Noon on Sunday. (Lodging, meals and transportation not included.)
